DETAILED ACTION

Allowable Subject Matter

Claims 14-20 are allowed. The following is an examiner's statement of reasons for allowance: As noted in the amendment (such as at pages 4-5), the prior art did not teach or suggest the particular features in the context of other limitations of the claims – such a computer system comprising a first node connectable to a second node by way of any of a plurality of gateway nodes, as required by the amended claims; such as the first node monitoring a gateway node for failure; such as the feature of if the gateway node fails, the first node deletes the session key from the cache store and searches the cache store to determine whether another session key has been cached allowing a new VPN connection to be established with the second node by way of another of the gateway nodes; such as the feature of if another session key has not been cached, the first node initiates a key establishment protocol exchange with a selected one of the gateway nodes, other than the failed node, to establish a new session key allowing a new VPN connection to be established with the second node by way of said selected one of the gateway nodes.
